Model information sheet

Passenger tricycle

A passenger-focused tricycle with a rear bench, foot supports and a choice of battery configurations.

Riding position	Upright + passenger bench
Frame	Non-folding
Battery	Single or dual battery options
Pedal assistance	Torque sensor
Suspension	Front suspension
Brakes	Mechanical discs
Listed rider height	158-193 cm rider
Overall width	93 cm
Listed weight	69 kg with single battery
Maximum claimed range	Up to 105 km single / 210 km dual (claimed)

Confirm rider, passenger and combined loading limits before purchase. Manufacturer load figures vary between sections. Price depends on battery selection.

Maximum ranges are manufacturer claims, not guarantees. Range changes with load, terrain, weather and assistance. Confirm fit and supplied configuration with Trike Bike. Tricycles can tip: practise progressively and slow before turns.
