Cargo box external size	910 L x 640 W x 580 H mm
Tyres	Size table: 20 x 2.4 in front / 24 x 3.0 in rear; confirm supplied tyres

Measure your access before ordering

Check gates, doorways, storage and turning space against the assembled dimensions. These are not shipping carton measurements. Arrange suitable handling for the listed weight. The manufacturer gives inconsistent metric tyre measurements, so confirm the tyres on the supplied model.

Carrying, care and purchasing

Children, pets and cargo

The removable bench is described for two children. Confirm approved seating, restraints and suitability for each child with Trike Bike before carrying passengers. Cargo space does not establish additional approved passenger places. Secure pets and loads and stay within the 100 kg cabin and 250 kg combined payload limits.

Use and configuration

Choose paved streets and smooth paths. This model is not intended for rugged off-road riding. Tricycles can tip: practise progressively, slow before turns and follow the supplied manual. Range depends on load, terrain, wind, temperature and assistance.

The manufacturer lists a removable thumb throttle and UL 2271 battery certification. Confirm the Australian motor and throttle configuration, matching battery and charger documentation, and suitability for your intended use. Suspension is not specified in the referenced Australian listing.

Ordering and local support

Contact Trike Bike Australia for current price, delivery charges and timing, assembly, spare parts and the warranty terms applicable to your purchase. Confirm the package contents and canopy inclusion; photographs may show optional equipment.
